LAB 4H: Finding Clusters
Response Sheet

Directions: Record your responses to the lab questions in the spaces provided.

Clustering data

The k-means algorithm

Running k-means

k-means vs. ground-truth
- **Compare the clusters chosen by k-means to the ground-truth. How successful was k-means at recovering the `league` information?**

On your own
- **Describe how the groups differ from eachother in terms of how long each group spends playing `videogames` and doing `homework`**
